Zeyad Lotfy Abd Elghany

Computer Engineering Student | Network & Cybersecurity

Phone: (+20) 1226715181 | Address: Cairo – Egypt | Gmail: lotfyzeyad350@gmail.com

LinkedIn: linkedin.com/in/zeyad-lotfy-790974347 | GitHub: github.com/lotfyzey

OBJECTIVE

Computer Engineering student building a strong foundation in Network Security and Cybersecurity, with hands-on experience in penetration testing, network administration, firewall configuration (FortiGate), and cloud security (AWS, Huawei Cloud). Practical background includes a full penetration test of a self-built web application (NileCare) covering access control, authentication, and CSRF vulnerabilities. Seeking an internship or entry-level position in Network Security / Cybersecurity to apply and grow these skills in a professional environment.

EDUCATION

Bachelor's in Computer Engineering – Faculty of Electronic Engineering, Minoufia University *Enrolled 2024*

EXPERIENCE & TRAINING

AWS Cloud Training – DEPI – Rowad *6-month – In Progress (~1.5 months completed)*

- Ongoing training covering AWS cloud fundamentals and core services.
- Building practical experience with AWS Academy Learner Labs, including VPC design and EC2 deployment.

Network & Cybersecurity Track – ITI Banha (Group #22) *Aug 2026 – In Progress*

- Network Fundamentals and Advanced Networking – routing, switching, and core protocols.
- Cyber Security Essentials – foundational security principles and threat landscape.
- Ethical Hacking – attack methodologies and hands-on offensive security practice.
- HCCDA – Huawei Cloud Computing Data Associate (self-study track).

FortiGate Training – NTI (National Telecommunication Institute) *1 month – Completed*

- Completed a one-month training program on FortiGate firewall configuration and administration.
- Covered core firewall policies, network security zones, and traffic monitoring fundamentals.

Professional Penetration Testing Intern – Edrak For AI *Jun 26 – Aug 10, 2026 (90 training hours)*

- Trained in Linux & Networking fundamentals, Cryptography, Reconnaissance techniques, Web Application Security, Network Security, API Security, and Vulnerability Assessment.
- Applied learned concepts in a hands-on final penetration testing project.
- Built on prior independent experience conducting a full penetration test on a self-developed web application.

Software Testing Intern – Pure Soft *Jan 2026 – Feb 2026*

- Completed hands-on training in Software Testing and Quality Assurance.
- Worked on manual and automated testing scenarios for software applications.
- Gained practical experience with test case design, bug reporting, and testing tools.

PROJECTS

NileCare – Personal Penetration Testing Project – Independent Project

- Conducted a full, structured penetration test of a self-built hospital patient portal web application.
- Identified and documented Broken Access Control vulnerabilities across multiple endpoints.
- Discovered an IDOR vulnerability via Base64 token manipulation, enabling unauthorized access to other users' data.
- Identified CSRF vulnerabilities on multiple endpoints and produced a formal security assessment report.

SKILLS

Networking: Network Fundamentals, Advanced Networking, TCP/IP, Routing & Switching

Security: Ethical Hacking, Penetration Testing, Vulnerability Assessment, Cryptography, Reconnaissance Techniques, Web Application Security, API Security, Access Control & Authentication Testing

Firewalls & Cloud: FortiGate Administration, AWS Cloud Fundamentals (VPC, EC2), Huawei Cloud (HCCDA)

Tools: Nmap, Wireshark, Kali Linux, Postman, JIRA

Programming: Python, C++, Java

Other: SDLC / STLC, Agile / Scrum, Technical Documentation & Reporting
