OBJECTIVE

Software Tester with a solid foundation in **manual and automated testing**, including test case design, defect reporting, and regression testing. Experienced with key tools such as **Selenium WebDriver**, **TestNG**, **JIRA**, and **Postman**, with strong knowledge of **SDLC**, **STLC**, **Black-Box Testing**, and **Agile methodologies**.

Highly detail-oriented, quick to learn, and able to analyze root causes efficiently to improve software quality.

Currently **seeking a Software Testing position** to apply my skills in a professional environment and contribute to delivering high-quality products.

EDUCATION

Bachelor's Engineering and computer science

Faculty of electronic engineering At Minoff

GPA: 3.51 out of 4

EXPERIENCES

Software Testing Intern – Pure Soft **(Jan 2026 – Present)**

- Completed hands-on training in **Software Testing and Quality Assurance**.
- Worked on **manual and automated testing** scenarios for software applications.
- Gained practical experience with **test cases design, bug reporting, and testing tools**.

Digital Egypt Pioneers Initiative – Software Testing Track **(Jul 2025 –December2025)**

enrolled in a hands-on training program focused on Software Testing.

- Practicing manual testing, writing test cases and bug reports.
- Learning and applying API testing using Postman.
- Gaining understanding of STLC, SDLC, and basic automation concepts.
- Practicing test automation for simple scenarios.

- Practical Project – Website Testing (Go-Bus.com Registration Page) Tested the registration form with positive and negative scenarios.

- Performed API testing on booking functions to validate request/response behavior.
- Identified and documented bugs related to validation, UI layout, and flow.
- Authored clear, structured test cases and defect reports. **- Graduation Project – Swag Labs (E-commerce Website)**
- Applied full testing process: test planning, design, execution, bug reporting, and automation.
- Performed functional, UI, and API testing.
- Developed and executed test automation scripts for login and checkout workflows.

- Delivered a comprehensive final testing report covering findings and defects
- Led a 5-person team during the final three months of the program, serving as the primary communication link between the team, DEPI leadership team, and the Ministry of Communications.

Skills

- Manual testing (Functional, Regression, Smoke tests)
- Automated testing using **Selenium WebDriver**, **TestNG**,
- Performance testing with JMeter
- API testing with **Postman**
- Defect tracking & reporting using **JIRA**
- Understanding **SDLC** & **STLC**
- SQL / Database testing basics
- Agile / Scrum methodologies
- Test documentation & reporting
- Programming: **Java, C++**

Achievement

Graduation Project – Software Testing & QA

- Tested a mobile/web application **Sauce Labs** using manual and automated testing.
- Project ranked **2nd place within the Digital Egypt Pioneers Initiative (DEPI)** by the Ministry of Communications and Information Technology (MCIT).
