OBJECTIVE

Software Tester with a solid foundation in manual and automated testing, including test case design, defect reporting, and regression testing. Experienced with key tools such as Selenium WebDriver, TestNG, JIRA, and Postman, with strong knowledge of SDLC, STLC, Black-Box Testing, and Agile methodologies. Highly detail-oriented, quick to learn, and able to analyze root causes efficiently to improve software quality. Currently a Computer Engineering student at Minoufia University, actively seeking a Software Testing internship or position to apply my skills in a professional environment and contribute to delivering high-quality products.

EDUCATION

Bachelor's in Computer Engineering

Faculty of Electronic Engineering, Minoufia University

Enrolled: 2024

EXPERIENCE

Machine Learning Intern (3 Months)

- Completed a 3-month hands-on internship focused on Machine Learning concepts and applications.
- Worked with supervised and unsupervised learning algorithms and model evaluation techniques.
- Gained practical experience in data preprocessing, feature engineering, and model training.

Software Testing Intern – Pure Soft (Jan 2026 – Feb 2026)

- Completed hands-on training in Software Testing and Quality Assurance.
- Worked on manual and automated testing scenarios for software applications.
- Gained practical experience with test cases design, bug reporting, and testing tools.

UI/UX Design Trainee – ITIDA (2025)

- Enrolled in a UI/UX Design training program under the Information Technology Industry Development Agency (ITIDA).
- Gained hands-on experience in user interface design principles and user experience concepts.
- Worked on designing and prototyping user-friendly interfaces.

Digital Egypt Pioneers Initiative – Software Testing Track (Jul 2025 – Dec 2025)

- Practiced manual testing, writing test cases and bug reports.
- Learned and applied API testing using Postman.
- Gained understanding of STLC, SDLC, and basic automation concepts.
- Practiced test automation for simple scenarios.

Practical Project – Website Testing (Go-Bus.com Registration Page)

- Tested the registration form with positive and negative scenarios.
- Performed API testing on booking functions to validate request/response behavior.
- Identified and documented bugs related to validation, UI layout, and flow.
- Authored clear, structured test cases and defect reports.

Graduation Project – Swag Labs (Ecommerce Website)

- Applied full testing process: test planning, design, execution, bug reporting, and automation.
- Performed functional, UI, and API testing.
- Developed and executed test automation scripts for login and checkout workflows.

• Delivered a comprehensive final testing report covering findings and defects.

• Led a 5-person team during the final three months of the program, serving as the primary communication link between the team, DEPI leadership team, and the Ministry of Communications.

SKILLS

• Manual testing (Functional, Regression, Smoke tests)

• Automated testing using Selenium WebDriver, TestNG

• Performance testing with JMeter

• API testing with Postman

• Defect tracking & reporting using JIRA

• Understanding SDLC & STLC

• SQL / Database testing basics

• Agile / Scrum methodologies

• Test documentation & reporting

• Programming: Java, C++

ACHIEVEMENT

Graduation Project – Software Testing & QA

• Tested a mobile/web application Sauce Labs using manual and automated testing.

• Project ranked 2nd place within the Digital Egypt Pioneers Initiative (DEPI) by the Ministry of Communications and Information Technology (MCIT).
